Take a deck of cards and relate the numbers to our modern day calendar.

There are 52 cards and 52 weeks, 13 cards in each suit and 13 new moons each year, as well as 13 weeks in each season of the year, represented in the deck by the four suits. But the most amazing connection occurs when we add up the numbers on each card in the deck. In doing this, we ascribe 1 to the Ace, 2 to the two and so forth. The Jacks are 11, Queens 12 and Kings, 13. The entire deck added together equals 364. With the addition of the Joker, we get exactly the number of days in the year.

As a little taste of this system, below is all you need to derive a little information about your Birth Card. Follow the instructions carefully to calculate your card and then read the meanings of its suit and number.

This is a list of all the birthdays of the year and the corresponding Birth Cards. You can use this to look up anyone you know.
